**EG&G ROCKY FLATS PARTICIPATION IN THE SOLAR WATER DETOXIFICATION
DEMONSTRATION PROGRAM (RFP No. RAV-3-12314)-TCG-003-93**

EG&G Rocky Flats welcomes the opportunity to participate with the SAIC team in the effort to develop and demonstrate solar water detoxification technology. This demonstration is in the form of a project proposal in response to the National Renewable Energy Laboratory's Request for Proposal entitled "Development of a Demonstration System for Solar Water Detoxification".

We are interested in the development of new water detoxification technologies as part of the Site Wide Treatability Studies program at Rocky Flats. The project would be in two phases. The first phase would be a bench scale demonstration of the technology. The second phase would be construction and operation of a pilot scale facility. The proposed site for the demonstration pilot plant at Rocky Flats will allow direct comparison of the performance of the solar detoxification system with a JV/peroxide lamp system which is currently operating.

EG&G Rocky Flats will provide support for Phase 1 of this project. The support will consist of funding (\$15,000) and on-site, man-power support. EG&G Rocky Flats will review the results of Phase 1 before committing to additional funding for Phase 2.

We look forward to working with you on the successful demonstration of solar water detoxification technology at Rocky Flats.

Sincerely,

F. C. Greengard
F. C. Greengard
